

JENNIFER MARTIN

SENIOR UX / PRODUCT DESIGNER

jennxiong5@gmail.com | [linkedin.com/in/jennifermartin24](https://www.linkedin.com/in/jennifermartin24) | jennmartin5.github.io/jennifer-martin-portfolio/

PROFESSIONAL SUMMARY

UX and product designer with 4+ years of experience simplifying complex healthcare, clinical-trial, and data workflows. Leads end-to-end design from discovery and research through prototyping, testing, developer handoff, and post-launch improvement. Combines enterprise product design, healthcare analytics, and published oncology research.

EXPERIENCE

UX Designer | Genospace | McKesson

Apr 2023 - Present

EHR-to-EDC Integration | Lead UX Designer

- Lead end-to-end design for a multi-phase enterprise product that transfers source data from electronic health records into clinical-trial databases; support active releases and future roadmap planning.
- Translate clinical, technical, and business requirements into workflows, wireframes, interactive prototypes, and production-ready interfaces; conduct research and usability testing and partner with product and engineering through developer handoff and post-launch refinement.

Single Patient View | Product Redesign

- Redesigned the patient-view experience around identified user pain points, improving how clinical users navigate and interpret patient information.

Role-Based Onboarding | Product Concept & Platform Strategy

- Initiated a role-based onboarding concept after identifying low use of SharePoint resources; designed user and admin experiences that enable administrators to build learning pathways by role.
- Research onboarding platforms and define an interim Userflow implementation approach while the custom solution awaits engineering capacity and funding.
- Deliver enhancements across established Genospace products, contribute to consistent design patterns, and manage the company website and LinkedIn and X channels.

Visualization Developer | McKesson

Oct 2021 - Apr 2023

Practice Growth & Market Expansion Dashboard | Tableau

- Designed and launched an internal Tableau dashboard from the ground up for 10-15 Practice Growth and Marketing users, supporting hiring, real-estate leasing, marketing, and physician-practice expansion decisions.
- Combined practice footprint, cancer incidence, referral patterns, and patient demographics in an interactive map that enabled users to evaluate surrounding markets by selected geographic radius.
- Met regularly with users to translate business questions into requirements, created wireframes and prototypes, conducted usability testing, analyzed trends and performance, and presented findings.

Oncology Care Model Research | Lead Analyst & First Author

- Led analysis of data from 14 physician practices, created Tableau visualizations, interpreted findings, coauthored a published ASCO abstract, and developed and presented the poster.
- Coordinated meetings and tracked team tasks in Asana across one to two concurrent dashboard projects.

CORE SKILLS

UX & Product Design: User research, stakeholder interviews, user flows, interaction design, wireframing, prototyping, usability testing, design systems, information architecture, developer handoff

Tools & Platforms: Figma, Tableau, Jira, Confluence, Asana, SharePoint, GA4, Squarespace, Userflow

Additional Strengths: Healthcare technology, clinical-trial workflows, data visualization, trend analysis, cross-functional collaboration, roadmap planning, presentation and facilitation

PUBLICATION

First Author: Xiong J, et al. "The impact of seasonality with hierarchical condition category coding on Oncology Care Model performance for the U.S. Oncology Network." *Journal of Clinical Oncology*. 2022;40(28_suppl):66. Published as Jennifer Xiong.
